

Final Exam Topics

The final exam will be on Thursday, June 9th. There will NOT be redo opportunities. You will need to bring your up-to-date JAM. You can expect short answer questions. Use old activities, assignments, spirals, and ASSESSMENTS to help be prepared.

- Make sure your JAM is up-to-date from any absences you may have had this semester.
- Constant of Proportionality on tables and graphs
- Solving proportions with fractions
- Using proportions to convert units
- Identifying proportional relationships
- Using proportional relationships to answer questions
- Percent proportions to calculate missing information
- Sales tax and discounts
- Percent change
- Absolute Value
- Integer addition, subtraction, multiplication, division, and combination expressions
- Plotting coordinate pairs
- Surface area of prisms
- Volume of compound rectangular prisms
- Mean, median, mode, range
- 5 number summary of data and inter-quartile range
